

## PEEK MACHINABLE SHAPES / PLATE, ROD, AND TUBING

**ADVANCED INDUSTRIAL** is setting the market Nationwide with the most competitive PEEK pricing in the country. If you are buying PEEK Rod, PEEK Sheet, or PEEK Tubular Bar or Tubing from anywhere else, **you are paying too much**. Call us Today at 1-800-265-7351 and discover incredible savings with your first inquiry.

**Our US Made PEEK** is currently available in Solid Round Bar up to 8" Diameter, Plate up to 4" Thick and we also offer extruded and molded Tubing with hundreds of ID/OD combinations **12" Diameter Rod and 12" Thick Plate Coming Soon!**

All of our PEEK is Made in the USA and meets or exceeds ASTM-D 6262 S-PAEK 0111, Mil-P-46183 Type 1, ISO 10993 , and also meets FAA FAR 25.853a. Our Virgin PEEK is FDA Compliant.

## CARBON FILLED AND BEARING GRADE PEEK

Carbon enhances the compressive strength, thermal conductivity and stiffness of PEEK while dramatically lowering its expansion rate making Carbon Fiber the foundation of most bearing grade PEEK materials. Many distributors only offer 1 Bearing Grade PEEK, Advanced offers over 20 Standard and Custom Blends that can be Injection Molded or Compression Molded in Small Batches. Call us at 1-800-265-7351 and let's talk about your Bearing Grade PEEK requirements Today!

## GLASS REINFORCED PEEK

Glassfiber reinforced PEEK exhibits higher modulus than Virgin PEEK, thus offering more resistance to deformation under load at elevated temperatures. This material is an ideal candidate for many structural component applications carrying high static loads. Glass Filled PEEK is available in Round Bar, Tubular Bar, Plate, and Sheet.

**All of our PEEK is Made in the USA** and meets or exceeds ASTM-D 6262 S-PAEK 0111, Mil-P-46183 Type 1, ISO 10993 , and also meets FAA FAR 25.853a. Our Virgin PEEK is FDA Compliant.
